

# Bailey

Bailey Fleet™  
Rainscreen System

Curved or flat,  
face fixed system  
with design flexibility

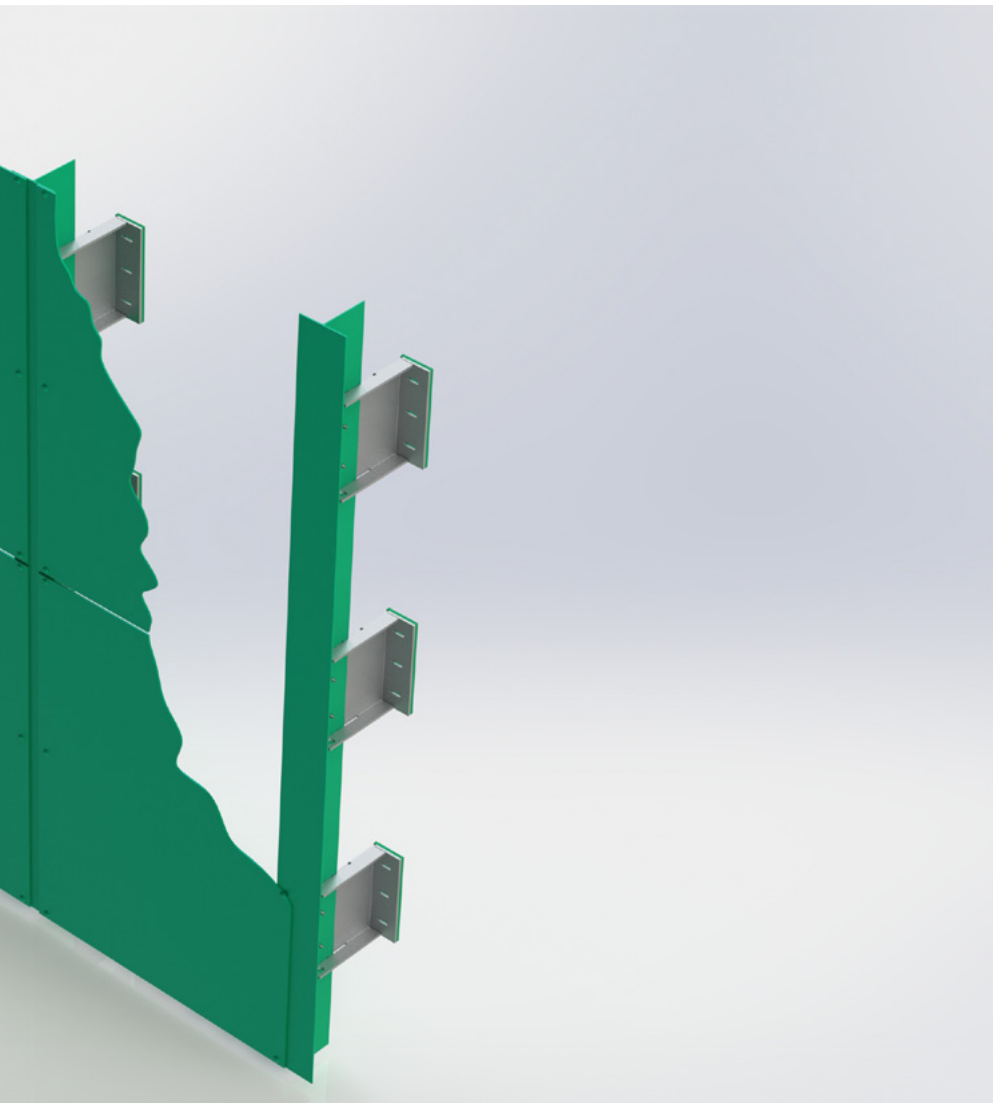

# Key benefits

The Bailey Fleet™ Rainscreen System is a cost effective cladding system that can be applied to a wide range of sizes and materials. It has the flexibility to remain entirely flat or to gently curve around a building's contours with relative ease. Its simple design allows the fastest possible installation and a crisp finish.

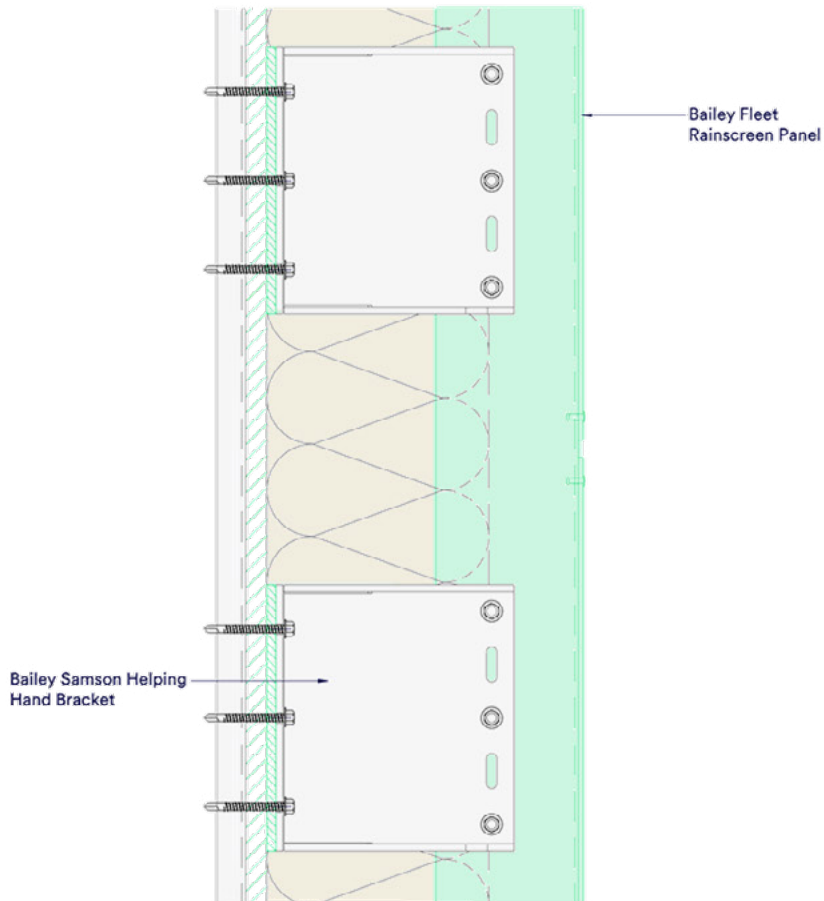

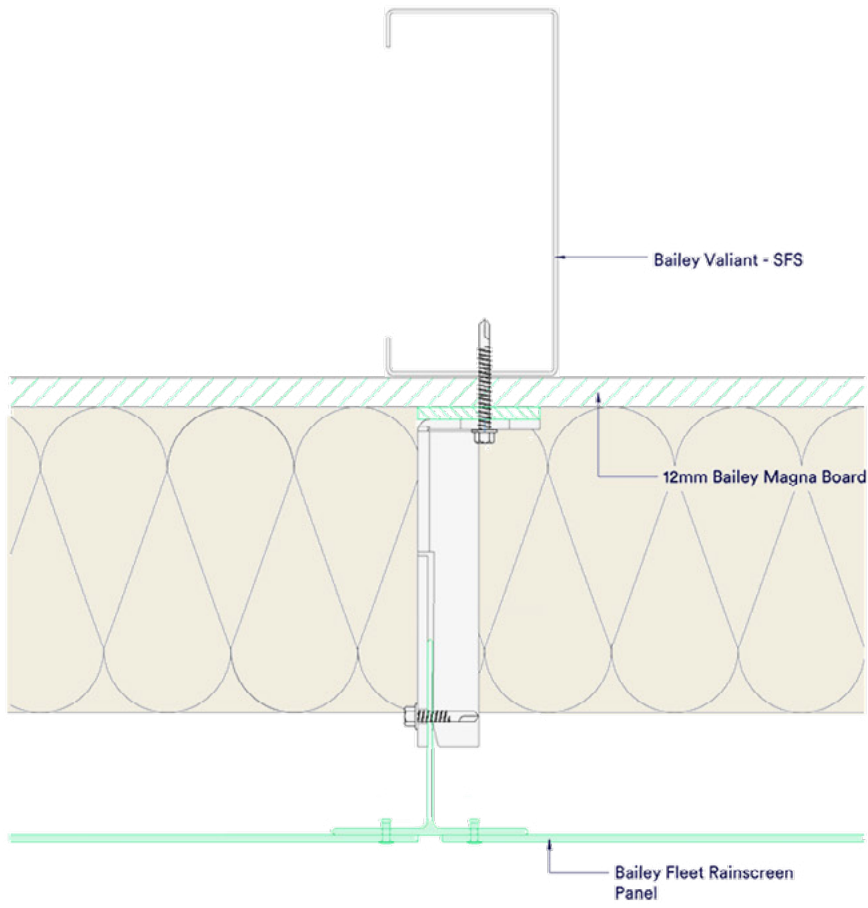

Simple design with profiled panels cut to size. Flat panels fixed directly to subgrid. Face fixed. No folding required on panels.

### Benefits and features

- Design and manufacture time can be reduced due to simplicity
- Easy to install system
- Most lightweight in our rainscreen range
- Panel removal is also quick making panels easy to replace and without the need for 3D parts
- Takes up a fraction of the site space of a folded system

## Uses and boundaries

Direct replacement for the fire remediation projects.

## Installation / application

Quick installation as panels can be moved easily around the site, stored with a small footprint and fitting is fast and effective.

## Storage

Panels are stacked flat onto one another making damage less likely and storage space more efficient.

## Sustainability

Lowest carbon footprint of all of the rainscreen range due to reduced manufacture, pallets and packaging, and deliveries.

## Associated products

Used in conjunction with Bailey Samson® Bailey Samson® Helping Hand Brackets.

## Services

- Level 1,2,3 design services and early project collaboration
- PCSA agreements
- Structural calculations available
- Wind loading calculations available
- Project fixings (including in-house powder coated heads) calculation and supply available
- Project samples available
